

Luncheon Seminar 18

How to get your clinical research published?

As a scientist, it is important to publish in a scientific article the symptoms and results of genomic analysis of unique patients you have studied. There are certain rules for writing manuscripts, and any major deviation from these rules will make it difficult for the manuscript to be accepted. In this luncheon seminar, four Asian Associate Editors of the American Journal of Medical Genetics will share their secrets for writing manuscripts that are likely to be accepted for publication and hold an open discussion. We hope that those who find it difficult to get their paper accepted will attend.

DATE

PM 12:00-12:50
Saturday, October 14

VENUE

Room F (Meeting Room1,3F)
Zenkoku Toshi Kaikan

CHAIR

Toshiki Takenouchi
Keio University School of Medicine

LS18-1

Clinical case value and presentation

Yiping Shen

Division of Genetics and Genomics, Boston Children's Hospital, USA

LS18-2

How to write succinct introduction

Guidelines for responding to reviewers

Tiong Yang Tan

Victorian Clinical Genetics Services, Murdoch Children's Research Institute,
University of Melbourne Department of Paediatrics, Royal Children's Hospital, Australia

LS18-3

How to produce publication quality figures

Katta M. Girisha

Department of Medical Genetics, Kasturba Medical College, India

LS18-4

Using the Elements of Morphology in your case reports

Brian H.Y. Chung

Department of Paediatrics and Adolescent Medicine, Li Ka Shing Faculty of Medicine,
The University of Hong Kong, Hong Kong SAR, China
