- Training, encouragement, motivation
- Using PDCA cycle
- Human resources (professional staff)
- Showing the data and outcomes
- Setting goals, sharing the outcomes
- Budget.

## A PRACTITIONER'S EXPECTATIONS

- Patient safety needs support from government, local and International organizations
- We need professional staff for patient safety
- Patient safety should be learnt in medical Universities and in continuing medical education program for all medical staff
- Patient safety should be one of the priorities in hospital management

## **CONCLUSIONS**

- Continuing quality improvement (KAIZEN) would be done at limited resources medical settings
- To be successful, Kaizen need support from Government,
  Ministry of Health, Director of medical setting and all staff
- Kaizen is easy to start but difficult to keep sustain

## **ACKNOWLEDGEMENTS**

- Japanese Government for inviting me and supporting my country.
- JICA experts for supporting me a lot in doing Kaizen
- All my colleagues who have been doing together with me on patient safety and quality improvement.

# **THANK YOU VERY MUCH**
