演題ID	,我们就是我们的问题,我们就是我们的问题,我们就是我们的问题,我们就是我们的问题,我们就是我们的问题,我们就是我们的问题,我们就是我们的问题。""我们就是我们就是 ————————————————————————————————————
100002	Pros and Cons of TAVI Devices which are Expected to be Approved in Japan in the Near Future
100003	Outcomes of transcatheter edge-to-edge repair for atrial functional mitral regurgitation
100004	Intimal Coverage Observed by OCT Mid-term After Stenting-Comparison in Each DES Group After the Second-Generation DES Including Polymer
100006	A case involved the repositioning of a stent that had extended into the aorta, relocating it within the coronary artery.
100007	Role of coronary atherosclerosis T1-weighted characterization with integrated anatomical reference (CATCH) to predict periprocedural myocardial
100008	A case of acute popliteal artery occlusion after traumatic tibial fracture successfully recanalized by prolonged dilation with a perfusion balloon
100010	A successfully shortened and retrieved a ruptured guidewire using the Twist Wire technique via the distal radial approach
100012	Two Cases of Postoperative Pseudoaneurysm Following Ascending Aorta Replacement for Type A Aortic Dissection Treated with Amplatzer Plug Er
100015	Treatment of Iatrogenic Pseudoaneurysm and Arteriovenous Fistula in the Brachial Artery Using PK Papyrus: A Case Report
100016	ISCHIEMIA/REVIVED do not deny the efficacy of PCI for CCS-searching for the best strategy for CCS patients-
100017	2 cases of OAS performed for lesions around LMT (Drive shaft rupture case, Crown damage case)
100020	A case of a fractured intravascular ultrasound catheter successfully retrieved with a gooseneck snare.
100022	A case of TAV in SAV that had difficulty passing through the valve due to graft curvature of ascending aorta.
100023	The efficacy of mechanical circulatory support for acute coronary syndrome of right coronary artery lesions with cardiogenic shock
100024	Safety and Efficacy of Percutaneous Coronary Intervention (PCI) with Intravascular Lithotripsy (IVL) for severe calcified lesion performed by junio
100025	A rare case of simultaneous acute cardio-cerebral infarction with cardiogenic shock
100026	A case with severe AS on hemodialysis of concomitant trans-subclavian TAVI and MICS-CABG with PCI
100027	A case of obstructive shock from mediastinal hematoma by chest compressions after successful primary percutaneous coronary intervention
100028	A case of myocardial infarction with single coronary artery originating from the right sinus of Valsalva, with coronary ectasia.
100029	Mid-term Outcomes in patients with Valve in Valve Transcatheter Aortic Valve Replacement Versus Redo Surgical AVR for Surgical Valve Deteriora
100030	Near-Infrared Spectroscopy Intravascular Ultrasound Imaging Evaluation of Non-target Lesions in Femoropopliteal Disease
100031	A case of mobile thrombus observed around the IMPELLA
100032	The long-term outcomes after clinical decision by nicorandil-FFR compared to ATP-FFR
100033	Drug-coated balloon versus drug-eluting stent followed by atherectomy device in calcified lesion
100034	Analyzing to predictors of Vaiabahn stent graft for prosthetic hemodaialysis grafts.
100035	Successful hemostasis achieved by placing a stentgraft over a stent placed in the common femoral artery
100036	Percutaneous Left Appendage Closure for Complicated Left Appendage Anatomy
100038	More than 80% of donor arteries of chronic total occlusion lesions have shown vulnerable features by coronary computed tomography angiograph
100039	Consideration of coronary microvascular dysfunction in our hospital
100040	Successful bail-out case of the catheter-induced dissection of the acute myocardial infarction in nondominant right coronary artery
100041	Impact of Impella availability on the patients with left main trunk culprit AMI
100042	Comparison of clinical outcomes between drug coated balloon versus drug eluting stent for femoropopliteal lesions in chronic limb threatening isch
100043	Effectivity of teaching coronary angiography to junior residents using YouTube and a homemade simulation
100044	The Efficacy of LAD Chronic Total Occlusion (CTO) PCI in Our Hospital
100045	The usefulness of pressure gradient measurement during percutaneous renal balloon dilation for secondary hypertension due to fibromuscular dys
100046	A case of AMI of young man with Behcet's disease
100047	Long and massive thrombus in the LCA: a case of AMI treated using immediate stenting and DOAC plus DAPT
100048	A case of very late stent thrombosis developed after Everolimus-eluting stent implantation.
100049	The Use and Pitfalls of FFR-CT in Our Hospital - 5-years of Experience
100050	High Detectability of Prehospital 12-Lead Electrocardiogram in Diagnosing Spasm-Induced Acute Coronary Syndrome
100052	Two cases which device that became difficult to retrieve during PCI or EVT was successfully retrieved using the "Flower Technique."
100053	A Rare Case of Axillary Artery Occlusion Associated with Thoracic Outlet Syndrome: Diagnosis through Angiography
100054	Effects of Long-term Carvedilol Therapy in Patients With ST-segment Elevation Myocardial Infarction and Mildly Reduced Left Ventricular Ejection
100055	Outcome of combination use of INOUE-Balloon and Self-expandable transcatheter valves for severe aortic stenosis in our hospital
100056	Successful revascularization of LAD failure case by double tip detection antegrade dissection re-entry.

100057	Efficacy of 3-minute dilation with a perfusion balloon and intracoronary administration of nicorandil in ACS with difficult distal protection	
100058	Midterm assessment of microvascular dysfunction with invasive measurement in ST-Segment-Elevation Myocardial Infarction patients: A pilot stud	
100060	Our Attempt at the Management of On-call-duty for Emergency Cardiac Catheter and the Change from Night-duty System to Night-shift System.	
100061	Recent trends of medications for secondary prevention and 1-year clinical outcomes in patients with ST-elevated myocardial infarction	
100063	Efficacy of debulking with Rotablader for in-stent restenosis with severe calcification	
100064	Rota-Tripsy and Oribital-Tripsy in severely calcified coronary artery lesions	
100066	A Case of an Allergy to Low Molecular Weight Dextran in OCT-Guided PCI	
100067	A Case of Bail Out the Tip Separation of a Guide Extension Catheter and Shaft Separation of Balloon.	
100068	Impact of Subjective Global Assessment in Patients with Chronic Limb-Threatening Ischemia who Underwent Endovascular Therapy	
100069	Experience with wire support in Gore Cardioform ASD occluder	
100070	Simplified jailed balloon technique without rewiring to side branches	
100071	Hybrid therapy for CTO with FF bypass occlusion	
100073	A case of coronary obstruction suspectedly due to native valve sinus sequestration	
100075	Impact of eicosapentaenoic acid to arachidonic acid ratio on subsequent cardiovascular events after endovascular therapy for femoropopliteal lesion	
100076	Three cases of Direct Coronary Atherectomy for in-stent restenosis/occlusion with pathology showing organic thrombus and genetic testing showing	
100077	Successful Percutaneous Coronary Intervention using Intravascular Ultrasound-Guided Rewiring Technique in a Case of Spontaneous Coronary Art	
100078	Correlation between Guidewire-Derived Coronary Flow Reserve and CZT-SPECT-Derived Myocardial Flow Reserve in Patients with Suspected Coron	
100079	Impact of Serum BNP Levels at Initial PCI and One Year Later on Subsequent Outcomes	
100081	Pre-close versus post-close using suture-mediated vascular closure system for catheter ablation with femoral vein access	
100082	A case of spontaneous coronary artery dissection (SCAD) in the postpartum period with STEMI and sudden deterioration after hospitalization	
100083	Real-time intravascular ultrasound guidance versus angiography guidance for left anterior descending artery ostial stenting	
100086	A case of left main trunk occlusion in the acute phase after surgical aortic valve replacement	
100087	A case of difficult retrieval of a jailed guidewire after coronary artery stenting	
100088	Intravascular Ultrasound-guided Retrograde Dissection and Reentry Using a Conquest Pro 12 Sharpened Tip in a Case of Coronary CTO	
100090	A 10-year study of out-of-hospital cardiac arrest due to ischemic heart disease at our hospital	
100091	Different association of the left and right ventricular impairment with long-term mortality in patients undergoing transcatheter aortic valve replace	
100092	Comparison of Clinical Outcomes between Drug-Eluting Stent and Drug-Coated Balloon Treatment with ST-Elevation Myocardial Infarction	
100093	The impact of maximal walking distance on restenosis following Eluvia drug-eluting stent implantation in the femoropopliteal artery	
100094	Exploring the Potential Benefits of Excimer Laser Coronary Atherectomy in ACS: A Stratified Analysis of Primary PCI Patients	
100095	Ischemic and Bleeding Events After First Major Bleeding Event in Patients Undergoing Coronary Stent Implantation	
100096	The Impact of High Triglycerides(HTG) on all patients and High non-HDL coresterol(HNHC)patients after endovascular treatments: From I-PAD Re	
100097	Upstroke Time as a Marker of Atherosclerosis in Stable Coronary Artery Disease Patients who Have a Normal Ankle-brachial Index	
100098	Acute coronary syndrome due to very late stent thrombosis 4 years after sirolimus-eluting stent with bioresorbable polymer implantation	
100099	Risk of failure of reverse wire technique in complex coronary bifurcation lesion	
100100	Speckle Tracking Analysis During Dobutamine Stress Echocardiography in patients Undergoing Percutaneous Coronary Intervention for Chronic To	
100101	The strategy for heart failure with LMT and aortic stenosis complicated by symptomatic cerebral hypoperfusion due to carotid artery stenosis.	
100102	Off Pump CABG 4 grafting + Right coronary artery aneurysm resection using a radial artery dissected by Special technique.	
100104	Long-term Kidney Function: OFDI-guided PCI vs. IVUS-guided PCI - A One-year Comparative Analysis Impact	
100105	Impact of the TIMI Risk Score for Secondary Prevention in Patients with Heavily Calcified Lesions Following Rotational Atherectomy	
100106	The relationship between coronary artery severity and choroidal arteriosclerosis.	
100107	Intraluminal Versus Subintimal Drug-Coated Balloon Angioplasty for the Treatment of Femoropopliteal Chronic Total Occlusions -Sub Analysis of the	
100108	Prognostic Relevance of Persistently Low Transvalvular Flow Rate after Transcatheter Aortic Valve Replacement in Japanese Population	
100109	Case of stent-less PCI with OAS and DCB for calcified lesion at ostium of RCA in angina-patient with metal allergies	
100110	The effect of an intensive lipid-lowering therapy protocol on achieving target LDL-C levels in patients with acute coronary syndrome	
100111	The case of PCI for RCA CTO with retrograde approach via GEA graft

100164	Another single universal guiding catheter also shortens door-to-balloon time.
100165	Registry studies of patients with acute myocardial infarction undergoing percutaneous coronary intervention in Chiba prefecture
100166	A case in which a guidewire left behind during EVT moved and formed an inflammatory tumor, requiring surgical resection
100167	Prognostic Impact of the 3A3B Score for Patients Undergoing Transcatheter Aortic Valve Implantation
100168	The Cutoff Value and Diagnostic Performance of Hyperemic Resting Full-cycle Ratio to Assess Functional Ischemia.
100170	Assessment of coronary engagement in patients after Transcatheter aortic valve implantation (TAVI) with Sapien series.
100171	Comparison of Effectiveness and Safety between Intravascular Lithotripsy and Rotational Atherectomy in the Severely Calcified Stenosis
100172	YS Inner Catheter for Guide Catheter Exchange in PCI
100173	One year outcomes of drug-coated balloon and drug-eluting stent for femoropopliteal artery
100175	Relationship between changes in renal function and urinary Neutrophil Gelatinase-Associated Lipocalin after transcatheter aortic valve implantation
100176	Delayed cardiac tamponade and gradually enlarging coronary aneurysm after directional coronary atherectomy.
100177	First Attempt of Tip Detection-Antegrade Dissection and Reentry Using Conventional Intravascular Ultrasound in Coronary Intervention
100178	Long-term Outcomes of Drug-Coated Balloon Angioplasty versus Drug-Eluting Stents for De-novo Large Coronary Artery Lesions: A 5-Year Observ
100179	Fluctuation of guidewire tip load by guide catheter position
100180	Short-term results of Harmony transcatheter pulmonary valve implantation
100181	Testing Rate and Distribution of Serum Lipoprotein(a) (Lp(a)) Levels in the Japanese Population at High Risk of Atherosclerotic Cardiovascular Dise
100183	Optimal timing for Impella placement during PCI treated with VA-ECMO in patients with AMI complicated by cardiogenic shock.
100184	Comparison of Clinical Outcomes of Low-dose Paclitaxel DCB Alone versus DCB and Bailout Stenting using DES for Femoropopliteal De-novo Lesion
100185	Predictors of discordant pattern between coronary computed tomographic angiography-derived extracellular volume fraction and cardiac magnetic
100186	A case of superficial femoral artery (SFA) aneurysm formation after Endo Vascular Treatment (EVT) using a drug-coated balloon (DCB)
100187	Acute Myocardial Infarction Due to Bioprosthetic Valve Thrombosis after Surgical Aortic Valve Replacement
100188	Impact of the COVID-19 pandemic on door-in door-out times in patients with ST elevation myocardial infarction.
100189	Prognostic Implications of Non-invasive Coronary Flow Capacity and Fractional Flow Reserve before Elective Drug-eluting Stent Implantation
100190	Relationship between onset of acute myocardial infarction and temperature
100191	Limited Effect of Pretreatment with Pulmonary Vasodilators Before Balloon Pulmonary Angioplasty on Pulmonary Hemodynamics in Patients With N
100192	A case of distant instent restenosis and stent deformation after using Rotablator for unevenly distributed calcified lesions
100193	Impact of Myocardial Bridging and Upstream Plaque Morphologies on Clinical Outcomes in Patients With Acute Coronary Syndrome
100194	Investigation of the correlation between the intravascular plaque area by IB-IVUS and the degree of plaque yellowness on coronary angioscopy.
100195	Efficacy of Impella CP-alone revascularization strategy without mechanical ventilation in Acute myocardial infarction-related cardiogenic shock.
100196	Impact of pullback pressure gradient on coronary flow reserve after elective percutaneous coronary intervention evaluated by transthoracic Dopple
100197	Safety and feasibility of a bedside post-closure technique after large-bore mechanical circulatory support in patients with cardiogenic shock
100200	A Successful Case of bailout using Rotablator for dislodge dropped and deformed Stent
100201	A case of cardiogenic shock due to AMI of RCA with LAD-CTO which complete revascularization with IMPELLA was beneficial
100202	A Novel Left Ventriculography Method for Diagnosing Takotsubo Syndrome under Percutaneous Ventricular Assist Device Support
100203	Actual usage of wearable cardioverter defibrillator after acute myocardial infarction -A report from SING AMI registry
100204	A case of LMT occlusion due to stent thrombosis caused by heparin-induced thrombocytopenia
100205	A dialysis case in which a new way was created using two-stage Rotablator at the ostium of the LCX
100207	An effective case of thrombus aspiration with a 4Fr child catheter for thrombotic occlusion in the proximal right coronary artery
100208	2 cases of ECPELLA-supported treatment for electrical storm due to myocardial ischemia which were able to discharge ambulatory.
100209	A challenging PCI by Intravascular Lithotripsy for calcified lesion of patient with severe 3VD-CAD and difficulty using mechanical circulatory suppor
100210	Complete Fracture and Retrieval of GORE Cardioform ASD occluder during transcatheter closure
100211	Young Male with Repeated ST-segment Elevation: Myocardial Infarction, Subacute Stent Thrombosis, and Vasospasm Related to SARS-CoV-2 infection
100212	Annular rupture due to pre-dilatation during Transcatheter Aortic Valve Implantation
100213	Case series on the safety of percutaneous coronary intervention using excimer laser after t-PA administration for ST-elevation myocardial infarction
100214	Impact of hyperuricemia on cardiac events in stable coronary artery disease patients with or without chronic kidney disease

100415	Outcomes after PCI or CABG in Left Main Coronary Artery Disease: TOkai LEft Main RevAscularizatioN sTrategy (TOLERANT) study
100416	Two Cases of Infected Femoral Pseudoaneurysm requiring Surgical Management attributable to the use of Suture-mediated Closure Device after E
100417	Evaluation of prognosis and complications in cases of Impella implementation: A single-center descriptive study.
100418	Predictors in Patients Undergoing Permanent Pacemaker Implantation Caused in TAVI
100419	The Association with Coronary Artery Perforation and Intravascular Imaging Use
100420	Intervention for CTO of RCA involved a slit creation at the tip of guide catheter to utilize ipsilateral collateral channel
100421	Emergent rotational atherectomy for a severe calcified LM bifurcation and LAD in a patient with STEMI-CS
100422	Impact of preoperative sarcopenia and malnutrition on survival outcome after transcatheter aortic valve implantation
100423	Successful bailout for acute limb ischemia post-removal of Impella CP®
100424	Percutaneous Transseptal Myocardial Ablation Improves Exercise Tolerance in Patients with Left Ventricular Outflow Tract Obstruction in the Chron
100425	Patient's pain, numbness, and satisfaction with the site of puncture in cardiac catheterization and compression hemostasis.
100426	Investigation the origin of sinus node artery in patients with atrial fibrillation compared to sinus rhythm using cardiac computed tomography.
100427	Detection of Malignancy by Gastrointestinal Endoscopy in the Perioperative Period of PCI
100428	Investigation of DCA strategy for LCx ostial lesion: A single center experience
100429	Case series of transcatheter aortic valve implantation for quadricuspid aortic valve
100430	Bleeding events and subsequent regimen of antithrombotic therapy in patients using anticoagulants who underwent percutaneous coronary interve
100431	Successful PCI for calcified lesions with Intravascular Lithotripsy in 4 patients with acute coronary syndrome
100432 100433	A case of acute coronary occlusion due to the thrombus after drug-eluting stent implantation treated with a covered stent.
100433	Interventional Cardiologist's Judgement in Ischemia Severity Assessment from Coronary Angiography: Reproducibility, Accuracy, and Treatment Ir A Case of Renal Artery Stenosis with Recurrent Restenosis
100434	Successful revascularization for RCA CTO after emergent surgical repair of ruptured SVG aneurysm
100433	Efficacy of Intra-Aortic Balloon Pump in Takotsubo Cardiomyopathy Patients Undergoing Extracorporeal Membrane Oxygenation: A Nationwide DPC
100438	Relationship between aortic valve calcification outside virtual valve ring and perivalvular leak after Sapien3 deployment
100439	Our experience in treating three cases of acute coronary syndromes with coronary artery origin anomalies
100440	Mid-term Outcomes of Drug-Coated Balloon after Rotational Atherectomy for Severe Calcified Coronary Lesion Compared with Drug-Eluting Stent
100441	Repeated 3-times-balloon-inflation method during coronary stent deployment reduces coronary dissection
100442	Prognostic Impact of Statin in Patients with CLTI and Malnutrition.
100443	Late lumen enlargement after treatment for very small coronary using Drug-coated balloon
100445	A case report of treating RCA-CTO with anomalous origin by retrograde approach, capturing the wire in LCA and completing externalization
100447	A case of AMI with simultaneous occlusion of two coronary arteries associated with vasospastic angina and secondary antiphospholipid antibody sy
100448	Procedural Success and Safety of Coronary Intravascular Lithotripsy in the Management of Severely Calcified Coronary Lesions: A Single-Center St
100449	Clinical outcomes of Eluvia drug-eluting stent for the treatment of femoropopliteal lesions in single center
100450	Proximal SFA-CTO puncture could be one of the retrograde options: A case of SFA-CTO
100451	A case with an unremovable device due to incomplete stent expansion resulting from stent balloon rupture
100453	A case of wiper-like DCA procedure for a restenosis of local DCA.
100454	A case of cardiogenic shock myocardial infarction with extremely poor vascular access for Impella insertion
100455	Recurrent patterns and clinical outcomes after drug-coated balloon angioplasty for femoropopliteal artery lesions
100456	Incidence, treatment strategy, and prognosis of spontaneous coronary artery dissection: a single-center retrospective cohort study
100457	A case of spontaneous coronary artery dissection successfully revascularized by IVUS-guided PCI with two guiding catheters.
100459	Sapien3 Ultra RESILIA in Evolut FX to bail out the paravalvular leakage due to insufficient expansion of Evolut FX
100461	Urgent complex TAVI with bilateral coronary protection supported by V-A ECMO for very severe aortic stenosis.
100462	Ultrathin-strut versus thin-strut stent healing and outcomes in preclinical and clinical subjects
100463	A case of bilateral trans-ankle intervention as a critical determinant of successful revascularization
100464	Prognostic value of lipoprotein(a) levels among patients who underwent PCI for acute coronary syndrome Mid torm Clinical Outcome of Underfilling Deployment of the Balloon Expandable Transcatheter Aertic Value Implantation
100465	Mid-term Clinical Outcome of Underfilling Deployment of the Balloon-Expandable Transcatheter Aortic Valve Implantation

演題ID	,我们就是我们就是我们就是我们就是我们的你们,我们就是我们就是我们就是我们就是我们就是我们就是我们就是我们就是我们的我们,我们就是我们就是我们就是我们就是我们就能 第二章
100466	Diminished 1,5-anhydroglucitol levels associated with short-term cardiac mortality in patients with acute coronary syndromes with HbA1c levels <
100469	How to treat acute aortic dissection with ST-segment elevation myocardial infarction
100470	CHADS2 score may be predictor of prognosis in patients with chronic limb-threatening ischemia after endovascular therapy with and without AF
100471	Association between serum cholinesterase and major adverse cardiovascular event in patients with lower extremity artery disease undergoing enc
100472	Significance of washout rate in 123I-BMIPP after acute coronary syndrome
100473	Transcatheter heart valve dependent differences in right ventricular pacing rate in patients requiring permanent pacemaker after transcatheter ao
100474	A case of coronary artery ectasia complicated by coronary spasm resulting in ACS triggered by COVID-19
100476	Inaccessible calcified subtotal occlusion at ostial RCA, rescued by retrograde approach via occluded SVG followed by rotational atherectomy
100477	A case of side branch occlusion possibly due to IVL use
100478	A case of deep vein thrombosis due to compression of the pseudoaneurysm complicated by endovascular therapy puncture
100479	Two cases of fulminant eosinophilic myocarditis with significant response to Impella
100480	Thrombosis patterns in impella manegement: Insights from our clinical practice data
100481	Successful guiding catheter exchange using YS inner catheter in a STEMI patient with difficult guiding catheter engagement
100482	Impact of the MELD-XI score in patients undergoing percutaneous coronary intervention: Results from the SAKURA PCI2 registry
100483	A case of acute inferior myocardial infarction with recurrent thrombosis bailed out with PK Papyrus covered stent
100484	A Case of Left Main Coronary Artery Occlusion with Cardiogenic Shock Who Underwent Percutaneous Coronary Intervention in a Regional Hospital
100485	Comparison of 2.0 mm drug-eluting stent and drug-eluting balloon for very small de novo coronary lesions identified by intravascular imaging
100486	The Comparison Between Surgical Revascularization and Endovascular Therapy for Patients with Acute Limb Ischemia at Our Hospital
100487	Snare-Guided Inserting an Impella CP Device after Aortic Valve Replacement
100488	Predictive Value of Machine Learning on Physiological Assessment for the Poor Prognosis in Patients with Non-Ischemic Lesions
100489	Assessment of Noble Simplified Risk Score (TOMIN risk score) to Predict In-Hospital-Mortality for Acute Coronary Syndrome Developed from Tokyo
100490	A case of successful hemostasis by coil embolization of an iatrogenic pseudoaneurysm after failed percutaneous thrombin infusion with balloon occ
100491	Safety and effectiveness of pressure-guided balloon pulmonary angioplasty using a pressure catheter for chronic thromboembolic pulmonary hype
100492	A case of successful treatment for severe coronary artery disease and classical low flow low gradient aortic stenosis
100494	The case of failure to pull out the kinking 8Fr guide catheter during percutaneous coronary intervention to chronic total occlusion
100495	A case of early thrombotic occlusion after endovascular treatment for aorto-iliac occlusive disease (Leriche syndrome)
100496	A single center experience of Percutaneous Coronary Intervention for ostial left circumflex
100497	A case of successful Trans-ankle Intervention for chronic total occlusion of the superficial femoral artery with limited access
100498	Shockwave Intravascular Lithotripsy for severely calcified coronary lesions: Short-term outcomes in a single center
100499	Nobel Techniue about Aorta-Iliac Lesion Modified CRAB technique(Non-covered stent inplantation techniue)
100500	Feasibility and safety of the distal radial access for vascular access interventional therapy
100501	A case of a large coronary artery aneurysm with repeated myocardial infarction due to thrombus treated with a covered stent
100502	One-year Outcomes of Transcatheter Aortic Valve Implantation with Balloon-expandable Valve in Patients with or without Dialysis: a Single-center
100503	The outcomes for acute myocardial infarction complicated with out-of-hospital cardiac arrest
100504	Clinical outcomes of patients with acute limb ischemia undergoing revascularization at our hospital
100505	Impact of modified balloon versus conventional balloon on calcium fractures as assessed by optical coherence tomography: a DIRO sub-study
100506	A case of traumatic acute ulnar artery occlusion treated with thrombus aspiration and catheter-directed thrombolysis.
100507	A case of chronic limb-threatening ischemia accompanied by major tissue loss successfully treated with endovascular treatment
100508 100509	Complex PCI and One-Year Outcomes in the OPTIVUS-Complex PCI Study Multivessel Cohort.
100509	Angioscopic observation of coronary and aortic atheromatous plaque regressions by PCSK9 inhibitor in a case of myocardial infarction Relationship between Oxidative Stress and Aortic Vulnerable Plaques detected by Non-obstructive Ceneral Angioscopy
100510	Relationship between Oxidative Stress and Aortic Vulnerable Plaques detected by Non-obstructive General Angioscopy
100511	The efficacy and safety of intravascular lithotripsy for severe calcified coronary lesions Is there any clinical significance regarding pre-balloon dilatation after intravascular lithotripsy in PCI?
100512	Comparison of clinical outcomes between stent-less drug coated balloon angioplasty and drug eluting stent implantation in calcified nodule.
100513	Factors associated with prognosis in patients undergoing percutaneous coronary intervention at our hospital
100514	n actors associated with prognosis in patients undergoing percutaneous coronary intervention at our nospital

演題ID	,我们就是我们就是我们就是我们就是我们的你们,我们就是我们就是我们就是我们就是我们就是我们的你们,我们就是我们的我们,我们就是我们就是我们的我们,我们就能能能能, 第1997年,我们就是我们就是我们就是我们就是我们就是我们就是我们就是我们的我们就是我们就是我们的我们就是我们的我们就是我们的我们就是我们就是我们就是我们就是我们
100619	The risk factors of progression to chronic limb-threatening ischemia after endovascular therapy in intermittent claudication patients
100620	A case report of successful an endovascular treatment for acute limb ischemia caused by ruptured Baker's cyst
100621	The association between nutritional status and clinical outcomes in chronic limb-threatening ischemia patients with wound undergone endovascula
100622	A case of cardiopulmonary arrest with Kounis Syndrome after contrast enhancement computed tomography.
100623	A Extreme-High Risk Case of LMT Calcified Lesion Complicated Pulmonary Hypertension due to Mitral Regurgitation and Reduced Left Ventricular F
100624	Effect of Coronary Calcified Lesions on the False-positive Rate of Fractional Flow Reserve Derived from Coronary Computed Tomography Angiogra
100625	A Case of Stent-less Treatment with Coronary Intravascular Lithotripsy for a Calcified Nodule Lesion
100626	A case of unsuccessful bail out for guidewire stuck and stent fracture during percutaneous coronary intervention
100627	A case of sub-acute thrombotic occlusion of abdominal aortic aneurysm treated by hybrid treatment
100628	A case of acute superior mesenteric artery occlusion treated by mechanical thrombectomy using a novel Indigo aspiration system
100629	Characteristics of symptom in patients with suspected INOCA who underwent IDP
100630	Influence of the Pulmonary Artery Pulsatility index on cardiovascular outcomes after successful percutaneous edge-to-edge repair for severe mitra
100631	A case of cerebral vascular embolism during percutaneous coronary intervention, where mechanical thrombectomy was performed rapidly in coop
100632	Clinical Outcome of Patients with Acute Myocardial Infarction And Out-of-Hospital Cardiac Arrest Undergoing Extracorporeal Cardiopulmonary Resu
100633	A case of coronary artery disease associated with IgG4-related disease
100634	A case of dobutamine-dependent severe AS treated with PCPS-assisted TAVI
100636	Mid-to-long term prognosis of paclitaxel-coated balloon
100637	A case of 93-year-old woman who achieved complete survival by utilizing various endovascular treatments
100639	Efficacy and Safety of Tip Detection Method for Complex Peripheral Artery Occlusive Disease
100640	Predictors of Target Lesion Revascularization at 12 Months for Severely Calcified Coronary Artery Lesions Treated with Atherectomy Device

100819	A case of DK-Crush stenting in a true left main bifurcation lesion with intravascular ultrasound -Verification with bench models-
100820	を 左主幹部閉塞による心筋梗塞ながら血行動態が安定していて、血行再建により心臓機能も改善した1症例
100821	Simultaneous Dual-Branch Occlusion in Non-Culprit Vessel following PCI in patients with STEMI
100822	A case of Balloon Pulmonary Angioplasty in a patient with Chronic Thromboembolic Pulmonary Hypertension harboring clone hematopoiesis with JA
100823	A case of Immunoglobulin G4-related pericoronary artery masses observed by intravascular ultrasound
100824	Risk factors of 30-day mortality in ACS patients undergoing PCI for LMT/LAD with mechanical circulatory support
100825	Usefulness of FFR Angio using a 3Fr catheter to evaluate functionalischemia
100826	Clinical outcomes of high-dose vs. low-dose drug-coated balloon angioplasty in femoropopliteal lesion
100827	Live image guidance-assisted transcatheter aortic valve replacement for aortic stenosis associated with mid left ventricular obstruction
100828	3 cases of percutaneous coronary intervention for Kawasaki disease-related coronary artery disease
100829	Comparison of bleeding complications and clinical outcomes with and without using heparin after PCI in patients with STEMI
100830	Optical frequency domain imaging (OFDI) evaluation of vessel characteristics changes during JETSTREAM atherectomy procedure
100831	An 8Fr sheath was inserted through a Supera stent placed in the CFA, followed by PCI to RCA CTO lesion.
100832	Results of the debulking device at our hospital, which is a newly approved facility
100833	Excimer laser coronary angioplasty versus thrombus aspiration prior to direct stenting for acute coronary syndrome.
100835	Prognosis of patients with transvenous pacemaker or leadless pacemaker after transcatheter aortic valve replacement.
100836	A case of percutaneous balloon aortic valvuloplasty as a bridge for transcatheter aortic valve implantation in frail patient.
100837 100838	Prehospital Cardiac Risk Assessment Index(P-CRAI) may contribute to appropriate hospital selection for AMI patients based on mortality difference
100838	Successful percutaneous intervention for a calcified saphenous vein graft using intravascular lithotripsy Discordance between resting and hyperemic assessments in coronary artery disease patterns
100840	Multidisciplinary Endovascular Treatment of Acute Brachiocephalic Artery Occlusion After Surgery for Type A Aortic Dissection
100842	Clinical outcome of peripheral fractional flow reserve measurement in the femoropopliteal lesion
100843	A study of factors contributing to insufficient stent expansion in percutaneous coronary intervention with intravascular lithotripsy
100844	A case of successful bailout of a SCAD extending from the LMT to the distal, using the tip detection method
100845	Evaluation of treatment outcomes using 2.0mm Drug-Eluting Stents for small vessel lesions.
100846	Nightmare case of conduction disturbance, left ventricular outflow tract obstruction and increasing pacing threshold after TAVI and alcohol septal a
100847	A case of POS with improvement of hypoxemia after percutaneous foramen ovale closure
100848	A Case of Coronary Thromboembolism Caused by Non-Infectious Thrombotic Endocarditis Which Presented Diagnostic Difficulties : A Case Report
100849	A successful case of balloon pulmonary angioplasty against chronic thromboembolic pulmonary artery hypertension concomitant with glucose-6-ph
100850	A case of stent deformation observed by OCT during stent Rotablation
100851	Evaluation of Tissue Protrusion Observed by Optical Coherence Tomography after Stent Implantation in Patient with Acute Myocardial Infarction
100852	Comparison between Balloon Dilation Alone and Additional Stenting for Acute Deep Vein Thrombosis with Iliac Compression Syndrome
100853	Clinical Impact of Uric Acid Levels on Prognosis after Acute Coronary Syndrom
100854	Slender balloon aortic valvuloplasty as a bridge to candidate in a patient with chronic limb-threatening ischemia
100855	Comparison of Outcomes of Elective and Non-elective Transcatheter Aortic Valve Implantation for Severe Aortic Stenosis.
100856	A fatal case of delayed coronary obstruction after transcatheter aortic valve implantation
100857	Serial changes of coronary microvascular dysfunction in a case with concomitant systemic AL amyloidosis and systemic wild-type transthyretin card
100858	Usefulness of Pericoronary Adipose Tissue Mean Attenuation as a Predictor of CoronaryMicrovascular Dysfunction.
100859	Predictors of re-occlusion of femoropopliteal lesions after treatment by drug-coated balloon
100860	A case of a parachute that was trapped at the distal end of a stent was removed.
100861	Prognostic impact of upward trend in LDL-C level during the early period following ACS in patients achieved guideline-recommended lipid level
100862 100863	A case of successful multidisciplinary therapy for ACS due to LMT true bifurcation lesion with electrical storm of ventricular fibrillation The Long-term Impact of Transcatheter Aortic Valve Implantation on Coronary Physiological Indices in Patients with Severe Aortic Stenosis
100863	Successful Catheter Ablation for Non-sustained Ventricular Tachycardia after Percutaneous Transluminal Septal Ablation in a Patient with Hypertrop
100865	A case of EVT and surgical treatment for popliteal artery entrapment syndrome

100866	Prospective Comparison of Luseogliflozin versus Dulaglutide on Regression of Coronary Atherosclerosis with Type 2 Diabetes Who Have Undergon
100867	A comparison among intravascular lithotripsy, rotational atherectomy and orbital atherectomy system for the treatment of severely calcified coror
100868	Effect of Follow-up Glycemic Control on Revascularization After Percutaneous Coronary Intervention in Patients with Diabetes
100869	A case of CLI due to stent occlusion where excimer laser was effective
100870	Efficacy of Intravascular Lithotripsy for Severely Calcified Culprit Lesion with Aortic Stenosis
100871	Prognosis of Low-Flow Low-Gradient Aortic Stenosis after Transcatheter Aortic Valve Implantation.
100872	A case of aorta injury at two months after EVT for abdominal aorta occlusion.
100873	Fatal sticking of radial artery sheath during emergency catheterization caused tear in ST-elevation myocardial infarction patients.
100875	Valve-in-Valve Transcatheter Aortic Valve Implantation for Stent-less Bioprosthetic Valve Failure: two cases of severe aortic insufficiency
100876	A Unique Case of DCA/DCB Intervention to Acute Myocardial Infarction
100877	Differences in Blood Flow Dynamics between Balloon- and Self-expandable Valves in Patients with Small Aortic Annulus Undergoing TAVR
100878	Cutting versus scoring balloon use for preparation of calcified plaque in percutaneous coronary intervention
100879	A case of coronary artery dissection caused by Shockwave C2 balloon rupture
100880	Successful circular expansion achieved in heavily calcified nodule stenosis of the sigmoid iliac artery bend using the ARCADIA technique.
100881	Diagnostic Performance of Computed Tomography-Derived Fractional Flow Reserve in Patients with Severe Aortic Stenosis
100882	A Case of Common Iliac artery CTO where IVUS-guided tip detection method are effective for rewiring
100884	A case of severe aortic stenosis with septic shock successfully treated by intra-aortic balloon pump as a bridge to TAVI
100885	Impact of Diabetes Mellitus on Coronary Artery Disease Patterns
100886	The report of iliac artery rupture during EVT which we had difficulty in achieving complete hemostasis
100887	A case of serial changes in non-obstructive aortic angioscopy (NOAA)-defined atherosclerotic aortic plaques of the patients with Acute Coronary S
100888	The Impact of Nutritional Status and Age on Prognosis After Percutaneous Coronary Intervention: Insights from the TWINCRE Registry
100889	Risk factors of new pacemaker implantation following TAVI with a self-expandable valve before and after introduction of cusp-overlap technique
100890	Relationship between guidewire position and medial injury after use of JETSTREAM for calcified femoropopliteal lesion
100891	Two cases of CAD presented a decrease in iFR value without obvious angiographic change
100892	The Impact of Malnutrition on Mortality Among Octogenarians Following ST-elevation Myocardial Infarction
100893	Absence of the Dicrotic Notch in Intracoronary Pressure Waveforms Could Predicts the Presence of Coronary Calcification
100894	Endovascular therapy for aortic dissection-associated superior mesenteric artery stenosis
100895	Intra-Procedural Stent Thrombosis: Predictive Factors in Patients with Acute Coronary Syndrome undergoing primary percutaneous coronary inter
100896	Anatomical and Functional Concordance in Assessing Coronary Artery Disease Complexity
100897	3 patients that we performed PCI in acute myocardial infarction caused by spontaneous coronary artery dissection (SCAD)
100898	Evaluation of the aortic valve by echocardiography in the perioperative period of proximal femur fracture surgery.
100899	The CT characteristics in patients with lower limb ischemia during veno-arterial ECMO support.
100900	A case of successful resuscitation by CABG under ECMO after right coronary artery occlusion following TAVI valve placement.
100901	Impact of the Pullback Pressure Gradient (PPG) on clinical decision-making
100902	Long-term prognostic impact of poor nutritional status in patients with stable angina pectoris undergoing percutaneous coronary intervention
100903	Giant coronary aneurysm with IgG4-related disease : An illustrative case presented with acute coronary syndrome
100904	A case of percutaneous retrieval of a dislodged left atrial appendage closure device
100905	Current status of coronary artery perforation in our hospital and bail out method
100906	Interaction between Coronary Flow Reserve and Left Ventricular Mass Index on prognosis of Patients with Non-obstructive Coronary Artery Diseas
100907	Clinical significance of QRS scores at hospitalization in ST-segment elevation myocardial infarction
100909	Visual functional mismatch assessed by quantitative coronary angiography (QCA) and Resting Full-cycle Ratio (RFR)
100910	Management of Coronary-Pulmonary Artery Fistula at Stent Thrombosis Site: Assessing Efficacy with CoroFlo Before and After Shunt Embolization
100911	A case of marked improvement of microcirculation disorder in acute and chronic phase based on IMR values Selection MCS for undergoing PCI in patients of STEMI of LMT stenosis treated with oral medication.
100912 100914	The Impact of Prosthesis-Patient Mismatch on Clinical Outcomes in Patients Undergoing Transcatheter Aortic Valve Implantation
100914	The impact of Frostnesis-Patient Mismatch on Clinical Outcomes in Patients Undergoing Transcatheter Aortic Valve Implantation

100915	Evaluation of late lumen enlargement after combined treatment with rotational atherectomy/orbital atherectomy system and drug coated balloon
100916	Effect of the Geriatric Nutritional Risk Index (GNRI) on post-PCI bleeding
100917	A Case of Acute Anterior Wall Myocardial Infarction caused by Embolization of Calcified Aortic Valve Tissue
100918	Mid-term Clinical Outcomes of Kissing Stent Technique for Aorto-iliac Bifurcation Lesion
100919	Risk factors and consequences of diagonal branch occlusion during percutaneous coronary intervention.
100920	Comparison of cutting balloon and scoring balloon for non-calcified lesion
100921	5-year Outcome of Treated by Drug-Coated Balloons for De Novo Lesions in Acute Coronary Syndrome and Chronic Coronary Syndrome patients
100922	Clinical Characteristics and In-hospital Outcomes in Patients With Spontaneous Coronary Artery Dissection
100923	Mitral Regurgitation Following Transcatheter Aortic Valve Replacement: Short-term Changes
100924	A Case of Acute Pericarditis after Percutaneous Coronary Intervention for Severe Calcified Lesion in Left Anterior Descending Artery
100925	Numerical Analysis of the Impact of Bifurcation Angles on Shear Stress and Blood Flow Pattern in Stented Coronary Artery Bifurcation
100926	A case of stentless percutaneous coronary intervention by directional coronary atherectomy for unstable angina pectoris with metal allergies
100927	High red blood cell distribution width to albumin ratio (RAR) is associated with mortality in patients with ischemic heart disease
100928	Clinical outcomes of ultra-low contrast PCI in patients with advanced CKD, including complex lesions
100929	Treatment Strategy for Aortic Stenosis Complicated with Severe Aortic Regurgitation and Cardiogenic Shock: A Case Report
100930	A case of effective debulking of heavily calcified coronary plaque with rotational atherectomy by optimizing the route of guidewire
100931	A case of directional coronary atherectomy for the organic stenotic lesion with vasospastic angina
100932	A Case of Ventricular Fibrillation in a Patient With a Transient Brugada-Like Electrocardiogram Pattern Caused by the Conus Branch Occlusion
100933	Cardiogenic Shock Following AMI ~The difference between NSTEMI and STEMI ~ : Data from the K-ACTIVE Registry.
100934	A case of STEMI with massive thrombus successfully treated acute phase with prolonged 10-minute dilation of a perfusion balloon
100935	STEMI patients transported by a Doctor Car had shorter first medical contact to balloon time and lower In-hospital mortality
100936	Challenges in the Management of Spontaneous Coronary Artery Dissection with ST-Elevation Myocardial Infarction through Percutaneous Coronary
100937	A case report of common iliac artery perforation by an inferior vena cava filter
100938	A case of calcified nodule at tortuous and severely calcified right coronary artery treated with orbital atherectomy
100939	Clinical outcomes of drug-coated balloon(Ranger) for the treatment of superficial femoral and popliteal artery disease in single center.
100940	Impact of Short Duration of Dual Antiplatelet Therapy on Outcomes with Drug-Eluting Stent for Unprotected Left Main Coronary Artery Diseases
100941	Early mortality and complication of Impella and ECPELLA therapy in patients with Cardiogenic Shock
100942	The frequency and clinical impact of HALT in TAVI with Navitor valve
100943	Association between periprocedural myocardial infraction and clinical outcomes at 1-year in chronic coronary syndrome patients using atherectom
100944	Successful endovascular thrombectomy therapy using a novel Indigo system for the treatment of acute limb ischemia caused by calcified nodule
100945	A case of coronary aneurysm developed from peri-stent contrast staining treated by the implantation of new stent to true lumen
100946	Sarcopenia is Associated with the Risk of Cardiovascular Events in No-Frailty Patients with Coronary Artery Disease Undergoing Percutaneous Coro
100947	Actual status of treatment for three-vessel coronary artery lesions and left main trunk lesions in our department
100948	Balloon pulmonary angioplasty (BPA) with contralateral injection for chronic total occlusion (CTO) of chronic thromboembolic pulmonary hypertentic
100949	A case of successful retrieval of fractured Orbital Atherectomy System during PCI for severe calcified tortuous lesion of LCX
100951	Correlation between computed tomography-derived myocardial extracellular volume and heart failure parameters in patients undergoing transcath
100952	A Case of severe Mitral Regurgitation with tortuous inferior vena cava, Shall we treat with TEER?
100953	A case of pulmonary hypertensive crisis caused by breath holding and selective pulmonary angiography during balloon pulmonary angioplasty
100954	Delayed Coronary Obstruction Caused by Thrombus in Native Sinus of Valsalva Following Transcatheter Aortic Valve Implantation
100955	A case of RCA and LAD proximal double CTO with LMT lesion which needed calcified debulking for severe calcified lesions
100956	A case of acute upper limb ischemia treated with a catheter via an occluded radial artery approach
100957	The therapeutic efficacy of Directional Coronary Atherectomy (DCA) for coronary bifurcation lesions
100958	A case of revascularization with a covered stent via the stent-struts for a stent jailed right common iliac artery occlusion
100959	The impact of discontinuing proprotein convertase subtilisin-kexin type 9 (PCSK9) inhibitors on clinical outcomes
100960	Examination of trend in the use of paclitaxel devices for endovascular therapy to the femoropopliteal artery disease in our hospital.

採択演題一覧 演題ID	。 1993年1月19日(1993年)———————————————————————————————————
100961	A case of PCI with a large-diameter rotablator via radial artery approach using a 7Fr sheathless system
100962	A case of spontaneous coronary artery dissection in a patient with dextrocardia status post open-heart surgeries to congenital heart disease
100964	The Assessment of Vessel Size Expansion in Femoropopliteal Artery Occlusions Post-Balloon Dilatation
100965	Impact of the Optimal Medical Therapy on Ten-year Outcome after Coronary Revascularization with Drug Eluting Stent
100966	A case of combined IVL and scoring balloon use in a highly calcified RCA lesion was effective for passing devices.
100968	Treatment Strategies and Outcomes of Patients with Acute Coronary Syndrome Requiring Cardiac Surgery on Remote Islands without Cardiac Sur
100970	A case of cardiac arrest due to coronary spasm after surgery for pancreatic cancer
100971	A case of coronary artery lesion caused by cardiac tumor
100972	The Impact of Combination of VA-ECMO and Impella (ECPELLA) on Short-term Outcomes in Patients with Refractory Cardiogenic Shock Received
100973	Recurrent ACS due to the progression in non-infarcted coronary lesion, despite no ischemic findings on myocardial scintigraphy and continued OM
100974	A case of congestive heart failure due to severe coronary artery diseases complicated by aortic stenosis
100975	Three cases report of hemolysis after transcatheter aortic valve implantation (TAVI) using balloon-expandable RESILIA valve.
100976	Association between renal function and CTO PCI outcomes.
100977	A rare case of late-acquired coronary stent malapposition after use of subtilisin/kexin type 9 (PCSK9) inhibitor
100978	The ALBI score can be a prognostic indicator after Percutaneous Coronary Intervention.
100979	A case of stent occlusion in chronic phase after stent implantation on a tortuous coronary artery lesion with accordion phenomenon
100981	Coronary microvascular spasm in a patient with Kounis syndrome
100982	Assessing the Safety and Efficacy of Endovascular Treatment Using the JETSTREAM Atherectomy System in Our Institute
100983	Validation of docosahexaenoic acid plus eicosatetraenoic acid to arachidonic acid ratios (DHA+EPA/AA) and clinical outcomes after endovascular the
100984	Delayed Onset of Acute Limb Compartment Syndrome After IMPELLA Therapy
100985 100986	Differences of FFR-CT Values by Severity of Myocardial Bridging in Patients with Ischemic Non-obstructive Coronary Artery Disease The impact of bleeding events in ACS patients who underwent mechanical support devices on one year outcome
100980	Comparison of clinical outcomes between third-generation and second-generation drug-eluting stent after rotational atherectomy facilitated percu
100987	A successful IMPELLA-assisted PCI after BAV for an extreme CHIP case with classical low-flow low-gradient severe AS
100990	A case of distal embolization following percutaneous atherectomy with the JETSTREAM device.
100991	Clinical performance of spot DES for FP lesions in our institution
100992	Comparison of microvascular obstruction and delayed enhancement assessed by dual-energy CT and cardiac MRI
100993	Impact of mean vs. minimum annulus diameter for pre-balloon aortic-valvuloplasty on procedure for implantation of a self-expandable valve durin
100994	Clinical Factors Associated with Late Lumen Enlargement Following Drug-Coated Balloon Angioplasty for de-novo Lesions
100995	Efficacy and Safety of the Percutaneous Suture-Mediated Vascular Closure System, Perclose Device, for Large-Bore Mechanical Circulatory Suppor
100998	Effect of Sacubitril/Valsartan on Left Ventricular Function by longitudinal strain in Chronic Heart Failure with or without ischemic heart disease
100999	The Impact of Blend PCI (Drug-Coated Balloon and Spot Stenting combined) for Lesions with High Syntax Score
101000	Two-staged coronary revascularization bridged with Impella for acute myocardial infarction due to left main coronary artery disease: a case report
101003	A case of LAD lesion successfully treated with PCSK9 inhibitor and drug intervention with OCT evaluation before and after initiation
101004	Comparison of conventional techniques and JETSTREAM for calcified lesions protruding into the lumen
101007	腸骨静脈圧迫症候群に合併した急性深部静脈血栓症に対してステント治療および2度のカテーテル血栓溶解療法を行った一例
101008	The relationship between Coronary microvascular dysfunction and short-term outcome after TAVR in patients with aortic stenosis without coronar
101009	Successful PTSMA cases with atypical feeding arteries
101010	Microvascular assessment in functional coronary artery disease patterns
101011	Evaluation of crack locations after coronary vessel preparation of calcified lesions with scoring or cutting balloons by optical coherence tomography
101012	A Case of Minimally Invasive DCA Achieved through Bilateral Distal Radial Artery Approaches with 7Fr & 5Fr guiding catheter system
101013	Association of High Lipoprotein(a) Levels with Adverse Outcomes in Patients with Stable Angina Undergoing Stentless PCI with Drug-coated Balloc
101015	The first in Japan, two cases of Harmony transcatheter pulmonary valve implantation via internal jugular vein access.
101018	Examining the usefulness of Tip Detection-ADR from the perspective of the transition from Tip Detection-intra plaque tracking
101019	A case of ventricular fibrillation due to Kounis syndrome, followed by complete atrioventricular block due to biphasic reaction of allergy.

採択演題一 演題ID	
通過101021	展起石 Has the rate of subsequent revascularization in patients with acute myocardial infarction improved?
101021	Efficacy and safety of balloon aortic valvuloplasty before non-cardiac surgery in our institution
101022	A case of entrapped and ruptured VIPERWIRE during PCI using OAS leading to difficulty in bailout
101023	Comparison of Three-Year Clinical Outcomes Between Covered Stents, Drug-Eluting Stents, and Drug-Coated Balloon in Endovascular Therapy for
101025	A case of successful reinsertion of IMPELLA unexpectedly removed from the left ventricle using a transradial BAV balloon
101026	Intravascular Ultrasound Predictors for Stent Edge Restenosis After Drug Eluting Stent Implantation for Small Coronary Artery
101027	Influence of Pressure Signal Drift on Diagnostic Performance of Post-Physiological Assessment in Stentless Percutaneous Coronary Intervention
101028	Effectiveness of wall pierce technique for trans-femoral approach in endovascular therapy
101029	Which Coronary Artery May be Preferred for Starting the Spasm Provocation Test?-Using a Propensity Score Matching-
101030	Development of a Novel Trans-endocardial Cell Delivery Catheter
101031	Pathological observation of explanted aortic bioprosthetic valves and pannus formation
101032	The differences of clinical characteristics and predictors of cardiovascular events between elderly and young patients with acute coronary syndrom
101033	A case of Mitraclip for severe MR with leaflet perforation and ruptured chordae tendineae at P2 by healed IE
101034	A case of bailout after the second MitraClip in a patient with SLDA the day after the MitraClip for FMR
101035	Optimal alignment of Evolut neo-commissures: improved, but still challenging?
101036	Effect of proportionality of secondary mitral regurgitation on cardiac sympathetic nerve activity following mitral valve transcatheter edge-to-edge
101037	A Case of Narrow Valsalva Sinus with low Left Coronary Origin Successfully Treated with Undersized SAPIEN 3 Ultra RESILIA 20mm
101038	Successful case of endovascular treatment to chronic total occlusion in superficial femoral artery using HIRANODOME technique and aspiration dev
101039	Effects of pemafibrate on detailed lipid profiles in patients with cardiac disease
101041	The efficacy and safety of drug-coated balloons in acute coronary syndromes with large vessel lesion
101042	Clinical Outcome of Endovascular Therapy for Patients with Deep Venous Thrombosis
101043 101044	A case of percutaneous retrieval of a protective tube of an exchange device that strayed into a coronary artery Low-dose Edoxaban in patients with indication for anticoagulation after transcatheter aortic valve replacement
101044	A Case of Assessment for STEMI Triggered by VSAP in Young Male Using IVUS and OCT.
101045	Impact of Pulmonary Hypertension after Transcatheter Aortic Valve Implantation on Prognosis
101047	A Case of Refractory Treatment due to Very Hard Nodular Calcification
101048	An extremely tough case of CLTI with severe calcification treated by several EVTs including broken balloon retrieva
101049	A Case of SFA CTO in which A Combination of Wingman 35 and Jetstream XC was Effective.
101052	A case of intima torn off by a thrombus aspiration device after dilation with a cutting balloon.
101053	Results of Rheocarna treatment for CLTI patients at our hospital
101054	The impact of hemodynamic profiles and clinical outcomes after mitral transcatheter edge-to-edge repair
101055	Acute Heart Failure with Severe Aortic Valve Stenosis in Acute Phase of Cerebral Hemorrhage: a case report.
101056	A case of emergency percutaneous transluminal renal artery angioplasty for acute renal infarction 18 hours after onset
101057	Complex NSTEMI Case: Shock, Calcified Triple-Vessel Disease, and Vf Storm - Catheter Timing, Revascularization, and MCS Considerations.
101058	Relationship between restenosis and CKD-MBD after DES implantation in hemodialysis patients
101059	Clinical Outcome of Jetstream Atherectomy: A Single-Center Experience
101060	Drug-coated balloon angioplasty versus drug-eluting stent implantation after rotational atherectomy for severe coronary artery calcification
101061	Which is the better treatment for small vessel coronary artery disease in hemodialysis patients, DES or DCB?
101062	A case of patent foramen ovale which was difficult to diagnose and catheter therapy due to long tunnel
101063	Intravascular Lithotripsy and modified balloon Angioplasty for Severely Calcified Coronary Arterial Disease
101064	Consideration of the insertion of sheaths of 16Fr or larger in the femoral vein
101065	Successful Closure of Axillary Artery Pseudoaneurysm with VIABAHN: A Remote Trauma Case.
101067	Comparison of primary patency of each final device for lesions with "coral-reef calcification" in femoropopliteal arteries
101068	The effect of the additional DCB treatment for ostial stenting after debulking with DCA for LMT bifurcation lesions
101069	Difference in treatment effect depending on the position of wire passage with Jetstream Atherectomy device.

101125	What is the therapeutic goal of catheter-directed thrombectomy for better outcome in acute pulmonary embolism? : a case report
101126	Stent size selection to achieve ideal dilation at both main vessel and side branch in the left main bifurcation.
101127	Comparison of the outcomes of three types of DCBs in endovascular therapy using propensity score matching analysis
101128	A Case of Successful Intervention for Ruptured Giant Coronary Artery Aneurysm: Placing Multiple PK Papyrus Stents Within a Long-Distance DES.
101129	Successful balloon dilatation to a deformed stent structure caused by stent ablation.
101130	Force required for dislodged stent retrieval into 6Fr-GC (Bear-Hug Method)
101131	Feasibility of Robot-EVUS-guided wiring for occlusive femoropopliteal lesions
101133	Possibility of routine use of the perfusion balloon (Ryusei) at primary PCI for ST-segment elevation acute myocardial infarction
101134	Impact of aortic regurgitation after transcatheter aortic valve implantation on clinical outcomes in patients with diastolic dysfunction
101135	Cardiogenic shock after nosecone retrieval of Evolut Fx in patient with anomalous origin of single coronary artery.
101136	The case of revascularization using Orbital Atherectomy System and additional drug-coated balloon angioplasty in dialysis patient
101137	Predictive Value of Artificial Intelligence-Enabled Electrocardiography in Patients with Takotsubo Cardiomyopathy
101138	Impact of appropriate stent size selection on stent apposition after kissing balloon inflation in the left main bifurcation.
101139	The Importance Calcium Fracture Width after Intravascular Lithotripsy for Severe Calcified Lesions
101140	A case of a COVID-positive patient with multi-vessel ACS involving the left main trunk treated with ELCA and IVL
101141	Occlusion of the origin of the circumflex artery during PCI of the occluded stent in the LAD.
101143	Association between coronary high-intensity plaque on CMR and pericoronary adipose tissue attenuation and plaque morphology on CCTA
101144	A case of ventricular septal rupture managed with ECPELLA Total Support showed Impella-induced aortic regurgitation and increased left-to-right
101145	Safety and Efficacy of Intravascular Lithotripsy in Patients with Severe Calcified Coronary Lesions: Mid-term Outcomes, A Single Center Experience
101146	Impact of implantation depth relative to membranous septum length on clinical outcomes of transcatheter aortic valve implantation
101147	A case of good outcome after single-stage PCI+TAVI for severe aortic stenosis with severe calcified three-vessel lesions
101148	Clinical Insights and Novel Presentation: Cardiobacterium hominis Endocarditis Manifesting as Isolated Renal Infarction - A Unique Case Report
101149	Successfully balloon aortic valvuloplasty for the patient with unicuspid aortic valve before surgical aortic valve replacement.
101150	A case of CHF and worsening renal function with successful weaning from dialysis byPTRA for VIABAHN restenosis after Chimney-EVAR
101151	Two Cases of ST-Elevation Myocardial Infarction (STEMI) in Young Men Due to Antiphospholipid Syndrome (APS)
101153	Relationship between initial dose of heparin administration and bleeding complications in patients with high bleeding risk (HBR) undergoing endov
101154	The calcified cases which intravascular lithotripsy just overcame challenging situation
101155	Evaluation of cases with catheter Intervention was performed despite negative stress myocardial perfusion imaging
101156	Feasibility of QFR measurement with 4Fr catheters
101157	A review of the use of ELCA in patients with coronary artery disease at our institution
101158	Clinical characteristics and associated factors of coronary microvascular dysfunction in patients with angina symptoms
101159	A Study of 8 patients treated with PCSK9 inhibitors for repeated in-stent restenosis
101160	Acute Coronary Syndrome caused by Intra-Plaque Hemorrhage: A Case Series
101161	A case of percutaneous thrombectomy using the Indigo system for thrombotic occlusion of the common iliac artery.
101162	Preprocedural Simulation of Mitral Transcatheter Edge-to-edge Repair on Computed Tomography Imaging
101163	Prognostic value of atrial fibrillation and anticoagulation in patients with acute aortic dissection
101164	A Case of Staged PCI for Low Cardiac Function due to Ischemic Cardiomyopathy with Renal Failure
101165	Prehospital Mobile Cloud ECG Transmission System Reduces Door-to-Balloon Time in patients with STEMI
101166	Which is the strongest backup system?
101167	A case in which GP-Lock was effective in treating a CTO of the RCA with abnormal origin
101169	The 1-year clinical outcomes after percutaneous coronary intervention using only drug coated balloon for true bifurcation lesion.
101170	Effective Use of IVUS Tip Detection Technic in Managing Bailout Complications during Calcified Lesion Treatment: A Case Report
101171	Cases of catheterization using the ulnar artery
101172	Integrated Approach to Challenging ACS Cases: A Rare T2MI Complication with Shock and Gastrointestinal Bleeding
101173	Parallel Perclose Technique: A Novel Post-Closure technique for large-bore arteriotomy

101174	Effects of trans-radial DCA procedure with 7 & 5Fr double guiding system for LM bifurcation lesions
101175	The case of malignant lymphoma successfully treated with stentless PCI
101176	ST-elevation acute myocardial infarction case with bradycardia and cardiogenic shock: What is the first action we should take?
101177	A successful CHIP intervention for cardiopulmonary arrest due to myocardial infarction combined with abdominal aortic aneurysm impending rapture
101178	Can early primary PCI of acute myocardial infarction patients reduce the need for ICD/CRT-D implantation?
101179	A Successful Case of Acute Limb Ischemia Treated by Two Session Endovascular Therapy Including Percutaneous Fogarty Technique
101180	A Terrible Case of Infective Aneurysm after VIABAHN Stent Graft Implantation
101181	Comparison of Intervention and non-Intervention for Radial Artery Occlusion following Distal Radial Artery Approach
101182	Comparison of Limb Outcome with and without Severe Calcificationfollowing VIABAHN Stent Graft Implantation for Femoropopliteal Lesion from LANDM/
101183	Wire Externalization for Difficult Cases to Deliver Left Ventricular Lead
101184	Disparity in Impact of Cilostazol on Patency after Endovascular Treatment with Various Devices from BEASTAS registry
101185	Clinical Impact of Endovascular Therapy in Stenting for Deep Vein Thrombosis
101186	The influence of post-PCI heparin administration for ACS patients; insight from STOPDAPT-3
300001	Prevalence and outcomes of stent-edge calcified nodules. A cross-sectional OCT imaging study
300002	Multifaceted Management of Severe Aortic Stenosis in a Complex Cardiovascular Case: Procedural Challenges of TAVI in a Geriatric Patient
300003	Cardiac arrest in diabetic with CKD during hemodialysis may need urgent coronary intervention.
300004	Outcomes of Severe Aortic Stenosis in Low-Volume Center
300005	Long-term Outcomes and Risk Factors Analysis of EndoVascular Aortic Repair (EVAR)
50001	Imaging Substudy of BIOMAG-I trial: A First-in-Human study of Third-Generation Resorbable Magnesium Scaffold
50002	3-minutes perfusion balloon pre-dilatation with intracoronary nicorandil administration in comparison with distal filter protection for patients with acute of
50003	Positive Impact of Balloon Pulmonary Angioplasty on the Diagnosis of Chronic Thromboembolic Pulmonary Hypertension: Insights from the COMMAND V
50004	Combined Therapy of Stent-Grafts with other Scaffolds in Femoro-Popliteal Artery.
50005	Laser Atherectomy for STEMI, PCI Analysis with Scintigraphy
50006	Cardiac Arrest and Post-Discharge Mortality in Patients with Myocardial Infarction: Insights from J-PCI OUTCOME Registry
50007	Mechanisms Leading to Peri-Procedural Myocardial Infarction in Focal and Diffuse Coronary Artery Disease: The PPG Global Study
50008	Clinical outcomes of percutaneous versus surgical Fogarty arterial thrombectomy in acute lower limb ischemia: insights from the P-Fogarty registry
50009	Analysis of the impact of nodular calcification on clinical outcome after drug-coated balloon angioplasty for femoropopliteal lesions (ALLIGATOR study)
50010	The First-in-Man Technique of Drug Eluting and Perfusion Therapy for Unprotected Left Main Coronary Artery Disease: The JDEPTH-LM Pilot Study
50011	Effect of PCSK9 Inhibitor Usage on Coronary Endothelial Dysfunction in Patients with Hypercholesterolemia after Coronary Stenting: The CuVIC-2 Trial
50012	Hemodynamics and mid-term prognosis after TAVI with SAPIEN3 Ultra/Ultra RESILIA vs. SAPIEN3
50013	Risk Factors of Acute Limb Ischemia after Femoropopliteal Endovascular Revascularization using the Latest Devices from Retrospective Multicenter Regis
50014	Predictive Ability of Delta-FFR for Future Cardiac Events at FFR-guided Deferred Coronary Lesions: Insights from the NCVC-DEFER Registry
50015	Prospective Investigation of Calcium Score in OCT-guided Revascularization to Identify Lesions with Low Risk for Stent Underexpansion - The CORAL Stud
50016	Prognostic Implications of Contrast-Associated Acute Kidney Injury after Percutaneous Coronary Intervention: A Stratified Risk Score Assessment
50017	Two-year Outcomes of Drug-eluting Stent Versus Drug-coated Balloon for Femoropopliteal Artery Lesions: BEASTARS Study Results
50018	Mortality Risk in Patients Undergoing Endovascular Therapy for Lower Extremity Artery Disease and Taking a Renin-angiotensin-aldosterone System Inh
50019	Disparity in Impact of Cilostazol on Patency after Endovascular Treatment with Various Devices from BEASTAS registry
