

## Special Interest Group: **Networking to Solve Undiagnosed Diseases**

Date

14:00 – 15:50 Thursday, October 12<sup>th</sup>

Venue

707, 7<sup>th</sup> floor of Toshi Center Hotel

Organizer

Chae Jong Hee (Seoul National University)  
Hisato Suzuki (University of Tsukuba)

Research projects to solve undiagnosed patients by performing exome and whole genome analysis are spreading around the world. In this session, researchers from Asian countries will present the current status of their undiagnosed disease programs. The purpose of this session is to share techniques and knowledge that have been useful for diagnosis, to share unresolved cases, and to promote international collaboration.

In this emerging field of human genetics, data sharing is truly essential. Let's meet and get to know each other personally!
