

Human Genetics Asia 2023

Date **2:30 PM to 4:30 PM**
Thursday, October **12**

Venue **Room 608, 6th floor**
Toshi Center Hotel, Tokyo

Special Interest Group:

Genomic and Epigenomic Analysis for Prenatal and Perinatal Disorders

The application of novel genomic technologies is essential to understand the mechanisms underlying prenatal and perinatal diseases and to improve diagnostic and therapeutic strategies.

Several speakers selected from oral and poster presenters, as well as the esteemed **Dr. Ritsuko Kimata Pooh (CRIFM Prenatal Medical Clinic, Japan)**, are going to deliver insightful presentations on relevant topics.

We hope this session will provide a good opportunity to the participants for a candid exchange of ideas and technologies.

Organizer:

Kenichiro Hata (Gunma University/NCCHD)

Hidenobu Soejima (Saga University)

Kazuhiko Nakabayashi (NCCHD)

NCCHD (National Center for Child Health and Development)
