一般ポスター01

April 17 (Thu.), 16:00~16:30, Poster room

腹腔鏡

Chair: Yasuyuki Kobayashi (Hiroshima City Hiroshima Citizens Hospital)

PP-01-01 Clinical study of laparoscopic adrenalectomy at our hospital

Ayaka Nakamura (Kita-Harima Medical Center)

PP-01-02 Outcomes of Laparoscopic Radical Nephrectomy, Laparoscopic Partial Nephrectomy, and Robotic-Assisted Laparoscopic Partial Nephrectomy at a Single Institution

Masahiro Nakano (Department of Urology, Gifu Prefectural General Medical Center)

PP-01-03 Giant hydronephrosis treated with laparoscopic nephrectomy after preoperative nephrostomy

Shinichi Takebe (International Goodwill Hospital)

PP-01-04 External validation of machine learning-based skill assessment system using motion metrics in laparoscopic wet lab training

Takashige Abe (Department of Renal and Genitourinary Surgery, Hokkaido University Graduate School of Medicine)

PP-01-05 Laparoscopic Urachal Resection for Urachal Remnant: Is Partial Resection of the Bladder Dome Necessary?

Masanobu Shiga (Urology, University of Tsukuba Hospital)

PP-01-06 Comparison of laparoscopic and robot-assisted laparoscopic surgeries for adrenal pheochromocytoma

Masahiro Goto (Teikyo University)

一般ポスター02

April 17 (Thu.), 16:00~16:40, Poster room

腎腫瘍／基礎・診断・マーカー①

Chair: Renpei Kato (Iwate Medical University)

PP-02-01 Regulating glutamine metabolism resensitizes to Cabozantinib in Cabozantinib-resistant renal cancer cells

Kento Morozumi (Tohoku Medical and Pharmaceutical University)

PP-02-02 Evaluation of MET-targeted therapy as a treatment method for renal cell carcinoma brain metastasis using a mouse model

Takahiro Akioka (Department of Urology, Faculty of Medicine, University of Miyazaki)

PP-02-03 5-Aminolevulinic acid suppresses renal cell carcinoma proliferation through mitochondrial iron reduction

Fumisato Maesaka (Department of Urology, Saiseikai Chuwa Hospital)

PP-02-04 The clarification of tumorigenic activity and clinicopathological features of Nectin-4 in renal cell carcinoma

Kenshiro Takemoto (Department of Urology, Graduate School of Biomedical and Health Sciences, Hiroshima University)

PP-02-05 Co-overexpression of ELOVL2 and ELOVL5 promotes clear cell renal cell carcinoma progression through LIMK1-mediated cytoskeletal reorganization

Shotaro Sakka (Department of Urology, University of Tsukuba Hospital / International University of Health and Welfare, Narita Hospital)

PP-02-06 Development and validation of an automatic R.E.N.A.L. nephrometry score measurement function

Shunsuke Miyamoto (Hiroshima University)

PP-02-07 Prognostic Value of Pan-Immune-Inflammation Value in Renal Cell Carcinoma Recurrence

Tooru Inoue (Department of Urology, Faculty of Medicine, Oita University)

PP-02-08 LncRNA AGAP2-AS1 from serum-derived exosomes as a prognostic biomarker for advanced renal cell carcinoma

Nakanori Fujii (Department of Urology, Graduate School of Medicine, Yamaguchi University)

一般ポスター03

April 17 (Thu.), 16:00~16:50, Poster room

腎腫瘍／薬物療法①

Chair: Mitsugu Kanehira (Department of Urology, Iwate Medical University)

PP-03-01 B-cell receptor repertoire analysis predict immune-related adverse events following immune checkpoint inhibitors combination therapy in renal cell carcinoma

Akihiro Yoshimura (Osaka University Graduate School of Medicine)

PP-03-02 The prognostic impact of the occurrence of immune related adverse events associated with combination immunotherapy metastatic renal cell carcinoma

Ayu Yoshida (Urology, Kushiro Rosai Hospital)

PP-03-03 Investigation of genetic polymorphisms associated with blood concentrations of cabozantinib in metastatic renal cell carcinoma
Keita Kobayashi (Department of Urology, Graduate School of Medicine, Yamaguchi University)

PP-03-04 Geriatric nutritional risk index as a prognostic marker of first-line immune checkpoint inhibitor combination therapy in patients with renal cell carcinoma
Shogo Watari (NHO Okayama Medical Center)

PP-03-05 Association Between Sarcopenia and Peripheral Blood CD8-Positive T Cell Count in Renal Cell Carcinoma Patients Undergoing IO+TKI Therapy
Saki Inaba (Department of Urology, Dokkyo Medical University Hospital)

PP-03-06 Patients' expectation for treatment for advanced renal cell carcinoma in the immune checkpoint inhibitor era
Takahito Negishi (NHO Kyushu Cancer Center)

PP-03-07 Hemoglobin and neutrophil levels predict the efficacy of ipilimumab plus nivolumab combination therapy in patients with metastatic renal cell carcinoma
Ryuga Kato (Nephro-Urology, Nagoya City University Hospital)

PP-03-08 Multicenter analysis of efficacy and irAE in first-line immune-checkpoint inhibitor combinations for metastatic renal cell carcinoma
Bunpei Isoda (Department of Urology, University of Tsukuba)

PP-03-09 Prognostic impact of cachexia index in patients receiving nivolumab plus ipilimumab for metastatic renal cell carcinoma
Shimpei Yamashita (Department of Urology, Wakayama Medical University)

PP-03-10 Fatal Complications Associated with the Use of Immune Checkpoint Inhibitors (ICIs) for Renal Cell Carcinoma
Tomoyasu Sano (Department of Urology, Nagoya University Hospital)

一般ポスター04

April 17 (Thu.), 16:00~16:50, Poster room

腎腫瘍／症例

Chair: Junji Yatsuda (Faculty of Life Sciences Kumamoto University)

PP-04-01 Cytokine Release Syndrome Treated with Tocilizumab Following Ipilimumab-Nivolumab Combination Therapy in Advanced Renal Cell Carcinoma

Shinya Sejiyama (Department of Urology, Oita University)

PP-04-02 A Case of Primary Renal Neuroendocrine Tumor with Hilar Lymph Node Recurrence 20 Years After Nephrectomy

Masataka Kubo (Department of Urology, Jikei University School of Medicine, Kashiwa Hospital)

PP-04-03 Two cases of renal cell carcinoma showing tumor shrinkage due to an abscopal effect

Yui Mizushima (University of Occupational and Environmental Health, Japan)

PP-04-04 A case of tumor-to-tumor metastasis caused by lung cancer metastasis into renal cell cancer

Yuhei Shiba (Urology, Chikamori Hospital)

PP-04-05 A case of oral mucositis caused by pembrolizumab and lenvatinib combination therapy for renal cell carcinoma

Yuki Morimura (NHO Takasaki General Medical Center)

PP-04-06 A case in which combination therapy of pembrolizumab and lenvatinib was effective for postoperative recurrence of FH-deficient renal cell carcinoma

Nobuaki Sato (Urology, Saga-ken Medical Centre Koseikan)

PP-04-07 A case of contralateral renal metastasis that grew rapidly and caused significant renal dysfunction 5 years after surgery for renal carcinoma

Kie Sekiguchi (Iwate Prefectural Chubu Hospital)

PP-04-08 A case of late recurrence of renal cancer spinal cord compression symptoms revealed

Daiki Hashizume (Iwate Prefectural Kamaishi Hospital)

PP-04-09 A case of nephrectomy after pembrolizumab plus lenvatinib combination therapy for metastatic renal cancer

Yuka Hirokami (Public Tomioka General Hospital)

April 17 (Thu.), 16:00~16:45, Poster room

尿路上皮腫瘍／基礎

Chair: Hirofumi Yoshino (Kagoshima University)

PP-05-01 Shotgun metagenomic sequencing enables the analysis of bacterial species information in serum extracellular vesicles of patients with urothelial carcinoma

Toshihiro Uemura (Department of Urology, Osaka University Graduate School of Medicine, Osaka, Japan)

PP-05-02 The Tumor Microenvironment of Upper Tract Urothelial Carcinoma Using Multiplex Fluorescence Immunohistochemistry

Kenta Takahashi (Urology, Iwate Medical University)

PP-05-03 The relationship between prognosis and reduction of 5-hydroxymethyl-2'-deoxycytidine in non-tumoral tissue of upper tract urothelial carcinoma patients

Ayana Takemura (Department of Urology, Hamamatsu University School of Medicine)

PP-05-04 A novel synthesized amphiphilic ethylene glycol squalene derivative suppresses BBN-induced bladder carcinogenesis in mice

Keisuke Sano (Department of Urology, University of Tsukuba)

PP-05-05 Elevated eosinophils proportion as predictor of immune-related adverse events after pembrolizumab treatment of metastatic urothelial carcinoma

Akira Hasegawa (Department of Genitourinary Oncology, Cancer Institute Hospital of Japanese Foundation for Cancer Research)

PP-05-06 Compound X inhibits growth of drug-resistant urothelial carcinoma: in vitro study

Toshiharu Morikawa (Department of Nephro-urology, Nagoya City University Graduate School of Medical Sciences)

PP-05-07 Intravesical Bacillus Calmette-Guerin for non-muscle invasive cancer promotes tertiary lymphoid structures formation in the tumor immune microenvironment

Daiki Ikarashi (Department of Urology, Iwate Medical University Hospital)

PP-05-08 Establishment of Upper Tract Urothelial Carcinoma Mouse Model with High Carcinogenesis and Survival Rate

Yuki Horibe (Department of Urology, Osaka University Graduate School of Medicine)

PP-05-09 Phospholipase D2 suppresses tumor progression by downregulation of IL-1beta secretion from tumor-associated macrophages in bladder cancer microenvironment

Kazuki Hamada (Department of Urology, University of Tsukuba)

一般ポスター06

April 17 (Thu.), 16:00~16:45, Poster room

膀胱腫瘍／薬物療法①

Chair: Shuichi Tatarano (Department of Urology, Graduate School of Medical and Dental Sciences, Kagoshima University)

PP-06-01 Treatment Intensity-Dependent Impact of BCG Maintenance Therapy on Recurrence-Free Survival: Real-world Conditional Survival analysis

Yukari Bando (Department of Surgery Related, Division of Urology, Kobe University Graduate School of Medicine)

PP-06-02 The determination of prognostic factors which predict clinical outcomes in patients with locally advanced or metastatic urothelial carcinoma

Takuma Satou (Department of Urology, Tohoku University Graduate School of Medicine)

PP-06-03 Real-world experience with Intra-arterial chemotherapy for advanced bladder cancer

Takeshi Ieda (Department of Urology, Juntendo University, Graduate School of Medicine)

PP-06-04 Impact of variations in dosage and frequency on the efficacy and safety of BCG intravesical therapy for non-muscle invasive bladder cancer

Gensuke Okazaki (Department of Urology, Anjo Kosei Hospital)

PP-06-05 Tuberculous prostatic abscess following intravesical bacillus Calmette-Guérin (BCG) immunotherapy successfully treated with levofloxacin, a case report

Mitsuru Kajiwara (Department of Urology, Hiroshima Prefectural Hospital)

PP-06-06 Treatment effectiveness for muscle-invasive bladder cancer in our hospital

Hiroshi Oike (Urology, Yamanashi Prefectural Central Hospital)

PP-06-07 Real-world data for metastatic urothelial carcinoma at Nagoya University and affiliated hospitals by time of treatment initiation
Sadafumi Tomioka (Urology, Yokkaichi Municipal Hospital)

PP-06-08 Efficacy and safety of neoadjuvant dose-dense MVAC therapy for urothelial carcinoma: single-center experience
Hazuki Inoue (Department of Urology, Teikyo University Hospital)

PP-06-09 Treatment efficacy of systemic therapy for patients with metastatic urothelial carcinoma by metastatic sites in real-world data
Shoma Yamamoto (Department of Urology, Graduate School of Medicine, Osaka Metropolitan University)

一般ポスター07

April 17 (Thu.), 16:00~16:50, Poster room

前立腺腫瘍／診断・マーカー①

Chair: Tomoharu Fukumori (Tokushima Municipal Hospital)

PP-07-01 Development and validation of machine learning-based predictive models for detecting significant prostate cancer: Comparison with a manually constructed model
Tsukasa Shinoda (Urology, Tokyo Metropolitan Cancer and Infectious Diseases Center Komagome Hospital)

PP-07-02 Our experience introducing the new prostate cancer tumor marker S23PSA test
Sho Nonoyama (Department of Urology, Asahikawa Kosei Hospital)

PP-07-03 Evaluation of Prostate Biopsy Efficiency Using PSA, PSAD, PHI, and PHID in Each PI-RADS Category
Eiji Matsubara (Department of Urology, Showa Medical University Northern Yokohama Hospital)

PP-07-04 Evaluation of Prostate Health Index (PHI) for detection of prostate cancer
Wataru Nakata (Urology, Ikeda City Hospital)

PP-07-05 The usefulness of Prostate Health Index (phi) for the detection of prostate cancer
Masakatsu Ueda (The Department of Urology, Shizuoka General Hospital)

PP-07-06 Study on the usefulness of prostate health index (phi) in prostate biopsy
Hiroyuki Kitou (Department of Urology, JCHO Tokyo Shinjuku Medical Center)

PP-07-07 The utility of PHI in cases with elevated age-stratified PSA cutoff values at physical examination

Rie Muta (Institute of Science Tokyo)

PP-07-08 Consideration of prostate cancer diagnosis using phi at Kochi Medical School Hospital

Tsutomu Shimamoto (Department of Urology, Kochi Medical School)

PP-07-09 Usefulness of S2,3PSA% for determining the indication of prostate biopsy

Takuji Shibahara (Department of Urology, Ise Red Cross Hospital)

PP-07-10 Evaluation of the utility of S2,3PSA% testing as an aid in the diagnosis of prostate cancer

Masaki Nakamura (NTT Medical Center Tokyo)

一般ポスター08

April 17 (Thu.), 16:00~16:45, Poster room

前立腺腫瘍／薬物療法①

Chair: Masayoshi Nagata (Juntendo University Hospital)

PP-08-01 Trends of novel antiandrogen receptor signal inhibitor use and medical costs in prostate cancer

Hikari Miura (Hirosaki General Medical Center)

PP-08-02 Nomogram for predicting time to CRPC in patients with mHSPC treated with ARSIs or vintage hormone therapy; data from the ULTRA-Japan Consortium

Yosuke Hirasawa (Department of Urology, Tokyo Medical University)

PP-08-03 Oncological outcomes in metastatic castration-sensitive prostate cancer with unfavorable risk factors in the upfront intensive therapy era

Hisashi Sakurai (Hirosaki University Department of Urology)

PP-08-04 Drug Interactions of androgen receptor signaling inhibitor in Metastatic Hormone Sensitive Prostate Cancer

Shota Kikuchi (Showa Medical University)

PP-08-05 Real-World Comparison of Apalutamide vs. Bicalutamide in Metastatic Hormone-Sensitive Prostate Cancer

Hidetsugu Takahashi (Department of Urology, Kameda General Hospital)

PP-08-06 Withdrawn

PP-08-07 Predicting Time to Castration Resistance with Androgen-Receptor Signaling Inhibitors in Hormone-Sensitive Prostate Cancer

Taizo Uchimoto (Ikoma City Hospital)

PP-08-08 Clinical effects of up-front therapies for primary high-risk castration-sensitive metastatic prostate cancer

Hideki Mukouyama (Department of Urology, Okinawa Nanbu Tokushukai Hospital)

PP-08-09 Real-world outcome of upfront intensive therapy for elderly patients with metastatic hormone-sensitive prostate cancer: A multicenter retrospective study

Yusuke Ozaki (Department of Urology, Towada City Hospital)

一般ポスター09

April 17 (Thu.), 16:00~16:50, Poster room

前立腺腫瘍／薬物療法②

Chair: Yoshihiro Nakagami (Showa Medical University Hospital)

PP-09-01 The efficacy of cabazitaxel for treatment of docetaxel-resistant prostate cancer correlating with the initial dose

Junichiro Hirata (Division of Urology, Department of Surgery Related, Kobe University Graduate School of Medicine)

PP-09-02 Effectiveness and safety of radium-223 dichloride in real-world practice for patients with castration-resistant prostate cancer and bone metastases

Soshi Kadena (Department of Urology, The Jikei University School of Medicine)

PP-09-03 The impact of the number of previous antiandrogen pathway inhibitors on the efficacy of cabazitaxel in patients with castration-resistant prostate cancer

Hisanori Taniguchi (Department of Urology and Andrology, Kansai Medical University)

Poster

PP-09-05 Clinical analysis of cabazitaxel for castration-resistant prostate cancer in our institution

Toshifumi Kurahashi (Urology, Hyogo Cancer Center)

PP-09-06 Effect of prior docetaxel treatment on the therapeutic response to radium-223 in castration-resistant prostate cancer

Monta Inoue (Department of Urology and Andrology, Kansai Medical University)

PP-09-07 Treatment outcomes of Ra-223 in bone metastasis cases of castration-resistant prostate cancer at our department

Norihiro Kusumi (Department of Urology, NHO Okayama Medical Center)

PP-09-08 The results of Ra-223 treatment for castration-resistant prostate cancer at our hospital

Yosuke Tsukii (Department of Urology, Nagoya City University Hospital)

PP-09-09 Prognostic values of modified Glasgow Prognostic Score and Systemic Immune-inflammation Index in mCRPC treated with cabazitaxel

Kotaro Suzuki (Division of Urology, Kobe University Hospital)

PP-09-10 Significance of multiple laboratory abnormalities in patients with castration-resistant prostate cancer treated with cabazitaxel

Kengo Sanada (Japanese Red Cross Society Himeji Hospital)

一般ポスター10

April 17 (Thu.), 16:00~16:40, Poster room

前立腺肥大症①

Chair: Toshiya Shitara (Fuchinobe General Hospital)

PP-10-01 Functional analysis and histological study of Galectin-3 in benign prostatic hyperplasia

Tetsuhiro Yano (Tokushima University Hospital)

PP-10-02 Efficacy of prostate urethral lift (PUL) in patients with urinary retention: A single-center retrospective study

Takayuki Yoshino (Department of Urology, Koyama Memorial Hospital)

PP-10-03 The usefulness of periapical triangle block for catheter-related bladder discomfort

Kuniaki Inoue (Urology, Osaka Gyomeikan Hospital)

PP-10-04 Results of Prostatic urethral lift(PUL) at our hospital after its introduction

Yoshikazu Kuroki (Department of Urology, Yao Municipal Hospital)

PP-10-05 Initial experience of prostatic urethral lift (PUL) for patients with dysuria in our hospital

Yoshiki Itatani (Fukui-ken Saiseikai Hospital)

PP-10-06 Initial Experience with AquaBeam for Benign Prostatic Hyperplasia at Kobe University Urology Department

Koki Maeda (Urology, Kobe University Graduate School of Medicine Kobe Japan)

PP-10-07 Efficacy and safety of BipolEP vs HoLEP for benign prostatic hyperplasia; a comparison study

Riki Obayashi (Kobe City Medical Center General Hospital)

PP-10-08 Bipolar enucleation of the prostate is safe and effective regardless of prostate volume

Yuya Ota (Anjo Kosei Hospital)

一般ポスター11

April 17 (Thu.), 16:00~16:35, Poster room

精巣腫瘍

Chair: Takashi Ueda (Department of Urology, Kyoto Prefectural University of Medicine)

PP-11-01 Comorbidities in testicular cancer survivors in Japan: a multi-institutional, cross-sectional study

Juntaro Koyama (Tohoku University Graduate School of Medicine)

PP-11-02 Post-chemotherapy laparoscopic retroperitoneal lymph node dissection for advanced germ cell tumors, single-center experience

Akira Nagahara (Department of Urology, Osaka International Cancer Institute)

PP-11-03 Outcome of patients with viable cells in residual tumor resected by post-chemotherapy retroperitoneal lymph node dissection for testicular cancer

Takuro Goto (Department of Urology, Tohoku University Graduate School of Medicine)

PP-11-04 Long non-coding RNA ZNF385D-AS1 as a new biomarker for testicular cancer

Hiroshi Hirata (Department of Urology, Yamaguchi University School of Medicine)

PP-11-05 Clinical review on prognostic factors in metastatic testicular tumors
Tatsuya Kawamura (Department of Urology, Iwate Medical University)

PP-11-06 A case of paratesticular leiomyoma
Yusuke Sugitani (Saiseikai Matsusaka General Hospital)

PP-11-07 A study on the status of sperm cryopreservation in testicular cancer patients at our department
Shun Kawamura (Division of Urology, Kobe University Graduate School of Medicine)

一般ポスター12

April 17 (Thu.), 16:00~16:40, Poster room

小児泌尿器科①

Chair: Hiroshi Asanuma (Department of Urology, Keio University School of Medicine)

PP-12-01 Can DMSA renal scintigraphy help to detect VUR?
Koki Sugimura (Pediatric Urology, Jichi Children's Medical Center Tochigi)

PP-12-02 Ipsilateral ureteroureterostomy for complete double ureter
Riku Uematu (Urology, Hyogo Prefectural Kobe Children's Hospital)

PP-12-03 Management of suspected ureterovesical junction obstruction at the time of pyeloplasty for ureteropelvic junction obstruction
Motofumi Tajima (Urology, Aichi Children's Health and Medical Center)

PP-12-04 Urinary and fecal incontinence affect health-related quality of life in children and adolescents with spina bifida
Yosuke Morizawa (Urology, Nara Medical University)

PP-12-05 Long-term treatment outcomes in patients with spina bifida by cystic and occult types: Analysis of the relationship between imaging findings and renal function
Satoshi Kurokawa (Department of Urology, J.A.Aichi Anjo Kosei Hospital)

PP-12-06 Pediatric Phimosi: Insights from a Single-Center Retrospective Study on Clinical Findings and Management Approaches
Masahiko Sasaki (Urology, Kanagawa Children's Medical Center)

PP-12-07 Management of lower urinary tract dysfunction in four patients with Down syndrome: a case report on urinary management
Yuri Mori (Urology, Shiga University of Medical Science)

- PP-12-08** Bladder management of smooth muscle dysfunction diagnosed by fetal megacystis: Case report of three girls successfully followed up
Chihiro Hayashi (Kanagawa Childrens Medical Center)

一般ポスター13

April 17 (Thu.), 16:00~16:40, Poster room

ロボット支援手術／腎腫瘍①

Chair: Tomoaki Terakawa (Kobe University Graduate School of Medicine)

- PP-13-01** Optimization of a prediction model for renal function after robot-assisted partial nephrectomy using machine learning with CT volumetry
Takashi Ikeda (Tokyo Women's Medical University)
- PP-13-02** Retroperitoneal Approach in Robot-Assisted Partial Nephrectomy is Useful for Patients with Tumor Position up to 20° Anterior to Horizontal line
Naoki Akagi (Kobe City Medical Center General Hospital)
- PP-13-03** Impact of early unclamping in robot-assisted laparoscopic partial nephrectomy: a propensity score-matched analysis in a single center
Kohei Ogawa (Department of Urology, Shimane University Faculty of Medicine)
- PP-13-04** Safety and Efficacy of robot-assisted partial nephrectomy in Patients with Chronic Kidney Disease
Yu Osaki (Takamatsu Red Cross Hospital)
- PP-13-05** A single center experience of robot-assisted partial nephrectomy for complex tumors (RENAL score > 10)
Daiki Ueno (Urology, Yokohama City University Hospital)
- PP-13-06** Clinical investigation of Robot-Assisted Partial nephrectomy for Cystic Renal Tumors
Kota Kobayashi (Department of Urology, Yokohama City University Hospital)
- PP-13-07** Perioperative, functional, and oncological outcomes in robot assisted partial nephrectomy in Elderly Patients: a propensity score-matched comparative analysis
Takuya Fujimoto (Hyogo Prefectural Amagasaki General Medical Center)

PP-13-08 Percutaneous cryoablation vs. robot-assisted partial nephrectomy in renal cell carcinoma: a retrospective comparison of safety and renal function preservation

Shoichi Nagamoto (Department of Urology, Saitama Medical Center, Saitama Medical University)

一般ポスター14

April 17 (Thu.), 16:00~16:40, Poster room

Renal tumors and basic research

Chair: Hisashi Hasumi (Yokohama City University)

PP-14-01 NPS-1034 Demonstrates Therapeutic Efficacy in Renal Cell Carcinoma by Targeting MET, AXL, and TNFRSF1A Signaling

Tzuo-yi Hsieh (Department of Urology, Chung Shan Medical University Hospital)

PP-14-02 Comprehensive analysis of the casual association between fatty acid and renal cancer: a mendelian randomization study

Xiaokai Shi (The Third Affiliated Hospital of Nanjing Medical University)

PP-14-03 Targeting NLRP3 Inflammasome: The Role of Turmeric Extract in Modulating Prostate Cancer Microenvironment

Mon Der Cho (Division of Urology, Kaohsiung Municipal Min-Sheng Hospital)

PP-14-04 Mendelian randomization revealed the causal association of circulating Glycoprotein acetyls with prostate cancer risk

Xiaokai Shi (The Third Affiliated Hospital of Nanjing Medical University)

PP-14-05 Superselective Indocyanine Green Fluorescence-Guided Embolization in Totally Endophytic Renal Masses during Robot-Assisted Partial Nephrectomy

Wen-hsin Tseng (Division of Urology, Department of Surgery, Chi Mei Medical Center, Tainan, Taiwan)

PP-14-06 Initial Experience of 3D reconstruction of renal vascular and tumor anatomy before nephron sparing nephrectomy

Hoi Lung Wong (Division of Urology, Department of Surgery, Queen Mary Hospital, Hong Kong)

PP-14-07 The peculiar relationship between kidney and thyroid: bidirectional metastasis of primary malignancy

Hsin Ting Yang (Division of Urology, Department of Surgery, Cathay General Hospital)

PP-14-08 Two Cases: Hemangioma mistaken for renal cell carcinoma in a patient with end-stage renal disease
